EDUCATION

Manipal University Jaipur

Bachelor of Technology

Jaipur, Rajasthan

Sept 2022 – June 2026

Jai Hind College

Higher Secondary Certificate

Mumbai, Maharashtra

Aug. 2020 – May 2022

Campion School

Indian Certificate of Secondary Education

Mumbai, Maharashtra

Aug. 2018 – June 2020

WORK EXPERIENCE

Glance (InMobi Group)

Software Engineer Intern, Android

Bengaluru, Karnataka

May 2025 – July 2025

- Engineered a multi-faceted login system for the Glance Android app, handling country-wise and age-based compliance logic which is now live on Android and iOS.
- Collaborated with backend, product, and QA teams to ensure seamless integration and on-time feature delivery.
- Improved application stability by debugging edge cases within a large-scale production codebase.

AWARDS AND CERTIFICATES

Dean's List

- Awarded the Dean's Excellence Award for securing the highest band GPA in the Department of Computer & Communication Engineering.

PROJECTS

Emotion-Aware Conversational AI | Python, OpenAI API, DeepFace, Streamlit

August 2025

- Built an emotion-aware conversational AI using DeepFace to detect real-time facial emotions from live video input.
- Integrated OpenAI GPT models to generate context-aware and empathetic responses based on detected emotions.
- Developed an interactive Streamlit web application supporting live camera feed and chat-based interaction.

FocusCycle Pomodoro | Next.js, TypeScript, MediaPipe, Vercel KV

Live

- Built a productivity web application with an accountability buddy system using face detection and tab-switch monitoring to enforce focus sessions.
- Implemented passwordless email-link authentication using JWT tokens and real-time exit approval workflows with Vercel KV (Redis).
- Developed real-time monitoring using MediaPipe BlazeFace and the browser Visibility API, automatically pausing sessions on violations.
- Deployed a full-stack Next.js application on Vercel with server-side API routes for email notifications, token management, and session state handling.

MERN Blog Application | MongoDB, Express.js, React.js, Node.js

November 2024

- Built a full-stack blog application using the MERN stack with JWT-based authentication and authorization.
- Designed a responsive React front end and developed RESTful APIs using Node.js and Express.js.
- Integrated MongoDB for efficient data storage and CRUD operations.

CERTIFICATIONS

Foundations of Data Science

Google (Coursera, Oct 2024)

Introduction to Software Engineering

IBM (Coursera, Oct 2024)

TECHNICAL SKILLS

Languages

Java, Python, C/C++, JavaScript, HTML/CSS

Frameworks

React, Express.js, Node.js

Databases

MongoDB
